REVENUE PATTERNS

- **Peak Profitability:** Thursdays & Fridays
- **Revenue Growth:** Directly correlated with transaction volume
- **Spikes** recorded pre-holidays and during regional tensions
- **Peak Season:** July – August

Sales by weekdays

Sales by Months

TRAFFIC PATTERNS

- **Peak vs. Off-Peak:** High weekend foot traffic contrasted with significant mid-week "dead zones"
- **Dwell Time Correlation:** Total basket value shows a direct correlation with time spent in-store

Customer Presence & Traffic

date (Date) / Average Daily						
hour	Sunday	Monday	Tuesday	Wednes...	Thursday	Friday
8						76
9	39	37	40	38		151
10	31	30	33	29	99	102
11	42	40	43	40	97	100
12	31	31	31	29	134	149
13	44	40	46	42	96	181
14	30	28	33	31	34	104
15	3	4	4	4	1	
16					98	
17	37	37	41	39	95	
18	30	30	33	32	132	
19	4	4	4	4	98	
20					33	
21					1	

CUSTOMER SEGMENTATION

- **Loyalty Drives Growth:** Loyal/returning customers generate the vast majority of revenue and maintain the highest Average Order Value (AOV)
- **Top-Tier Engagement:** High overlap between "Top Spenders" and "Most Frequent Visitors," highlighting a core group of power users
- **New Customer Opportunity:** While regulars dominate, a distinct peak in new customers occurs mid-week at 19:00, **reaching 15% on Tuesday evenings**

Revenue Share

CASHIER STAFFING OPTIMIZATION

- **The Goal:** 12 Transactions / Hour per Cashier (minimum 1 cashier per shift)
- **Labor Misalignment:** "Dead Zones" with zero activity alongside critical understaffing during peak hours
- **The "Gap" Opportunity:** Analysis shows a **weekly surplus of 44 labor hours**
- **Recommendation:** Align shift schedules with real-time traffic to reduce queue friction and maximize operational efficiency

Gap between recommended and actual number of cashiers

OPERATIONAL MONITORING & OPTIMIZATION

Maximize **Data Coverage**

Incentivize app installation to capture the 10% of transactions currently invisible to behavioral tracking.

Improve **Efficiency**

Shift to a 4-minute interval to ensure the 40% delivery target is met, as 30% of current logs fail this benchmark.

Simplify **Location Strategy**

Pivot to Zonal Tracking to bypass the 30% outlier rate (accuracy >30m) and resolve zone-assignment overlaps.

Automated **Staffing Alerts**

Implement real-time notifications triggered by the 12 transactions/hour threshold to optimize cashier reinforcement.

STRATEGIC INSIGHTS & BUSINESS GROWTH

Problem: Negative Growth Trend. Significant gradual decline in unique users (avg. -0.85/week).

Action Item: Invest in targeted marketing to stop erosion and stabilize the customer base.

Problem: Traffic Imbalance. Extreme peaks during weekends vs. low mid-week activity create operational strain and underutilized resources.

Action Item: Offer mid-week incentives to shift traffic and optimize operating hours to match actual traffic, reducing unnecessary expenses.
